

# Service and maintenance with Johnson Controls

## Preventing a small fire from becoming a large-scale incident

Johnson Controls recognises that first aid firefighting equipment can prevent a small fire from becoming a large-scale incident. The correct use of a fire extinguisher can stop a fire in its tracks and prevent further damage should one occur. The correct extinguisher must be used to avoid exacerbating the situation. Similarly, fire extinguishers need to be maintained regularly to ensure their effectiveness.

### What we offer

We can survey your premises and advise on the placement and requirements for fire extinguishers.

We supply fire extinguishers manufactured to high standards and in accordance with BS EN3 regulations.

All extinguishers are CE approved, kite-marked, and fire-rated for your safety assurance.

Our sales staff will be happy to assemble a service plan to meet your individual needs and requirements.

### Accreditation:

Our BAFE-accredited engineers operate under the BAFE scheme SP101/ST104.

To implement the comprehensive cover offered, we have dedicated teams of service engineers available 24/7/365 nationally to support our customer base.
